

Continuity of Care

STUDENT MIDWIFE

My name is Shantelle and I am studying to be a midwife at ACU. As part of our training we follow birthing people through their pregnancy journey. This helps us become better midwives but also provides birthing people in the community access to a known support. This means that I will be there to help you navigate the system, assist with questions, advocate for you and provide you and your family with support.

The minimum requirement is to accompany you to:

4 antenatal appointments

2 postnatal appointments

My level of involvement is up to you and I am able to attend more than this and your labour and birth if you feel comfortable.
